Why Goodbody?

We are a one-of-a-kind CBD Company, being industry leaders in the retail of CBD as well as the extraction, testing, and production of CBD goods.

Through this, we are confident in consistently delivering to the public our highest quality CBD products, which we and many customers consider the highest quality available on the market today. We do this through our use of high-quality ingredients and rigorous testing, and in tandem with our clear messaging, dedication to transparency, and exceptional customer services, we aim to ensure you feel reassured and informed at every point.

Seed to Shelf Reassurance

The Goodbody Botanicals and Wellness brands are born of a need – people want to buy CBD products they can trust, knowing that what you see is what you get. You want products that are legal, great quality and tested by a certified laboratory. Additionally, you want the added reassurance that you will receive that high quality with every purchase.

Both our Goodbody Botanicals and Goodbody Wellness brands offer products that meet those criteria every time. How do we do that?

- **Traceability**

As part of the Sativa Wellness Group Inc, we own every step of the manufacturing process – from the seed in the ground to the bottling of the product. No other brand in the UK can offer that – meaning we can ensure that we are producing a high-quality product for you, every time.

- **Quality**

Phytovista Laboratories is Sativa Wellness Group's independent analytical hemp and CBD testing facility. Our laboratory is the UK's premier testing facility and tests each batch of products to ensure stringent quality control. To add to our dedication to transparency, each product that you buy will have a QR code that provides a link to the publicly accessible lab report for that product to ensure every customer knows exactly what they're taking.

- **Research**

Goodbody Botanicals and Goodbody Wellness are part of the Sativa Wellness Group Inc, and our research company (Sativa Cultivation and Extraction) has entered a research partnership with King's College London looking at respiratory disease.

- **Innovation**

We are shaping the future of the CBD product landscape through our innovation and manufacturing to better aid the development of more holistic CBD-oriented products and ranges.

- **5 Star Reviews**

Our products are backed with 5-star reviews due to our consistent quality and service, every time.

We offer you products that are:

- Seed to shelf full traceability
- THC free
- UK laboratory tested – QR Coded to scan to take you to the laboratory tested certificate
- Formulated within the UK
- 5-star customer reviews
- Consistent quality every time you purchase
